## ***DKI Jakarta Environmental Agency***

Waste Management Through The Jakarta Waste Awareness and  
Governor Regulation

## Jakarta Waste Awareness

For more info, kindly visit:  
[Jakarta Rendah Emisi](#)

**JAKARTA  
SADAR SAMPAH**

## Jakarta Waste Awareness (Jakarta Sadar Sampah or in short JSS):

- ❑ An integrated program and branding that is being used to introduce and promote a new paradigm of waste management in DKI Jakarta from **KUPANG** (**Ku**mput/collect – **Ang**kut/transport – **Buang**/dispose).
- ❑ The new paradigm is now **Kurangi**, **Pilah** and **Olah** or it called “**KuPiLah**”

Kurangi/  
Reduce

Pilah/  
Sorting

Olah/  
Recycle

- ❑ The program is initiated by the DKI Jakarta provincial government through the Environment Agency.
- ❑ This program encourages **participatory** and **collaboration** of multi-stakeholders from **government, private sectors, communities, individuals and others** that have one purpose towards cleaner and greener Jakarta through awareness on how to manage waste.

## CAP SEA's Pilot Project Activities

# DKI Jakarta' Effort in Reducing (Single-Use) Plastic Waste

Issuance of Jakarta Governor Regulation No. 142 of 2019 about the obligation to use eco-friendly shopping bags

- ✓ Focus on shopping centers, supermarket/grocery stores and traditional markets.
- ✓ The implementation of regulation is supported by Gerakan Indonesia Diet Kantong Plastik (**GIDKP**).
- ✓ Supported by the **incentives (fiscal & non-fiscal)** provision regulated under Governor Regulation No. 111/2021.
- ✓ DKI Jakarta contribution towards the Ministry of Environment and Forestry Regulation P.75 of 2019, the **roadmap for waste reduction by producers/manufacturers**

monitoring & supervision

publication and education

# *DKI Jakarta' Support The Jakarta Reuse Movement in Food Delivery Service*

## *CAP SEA's Pilot Project Activities*

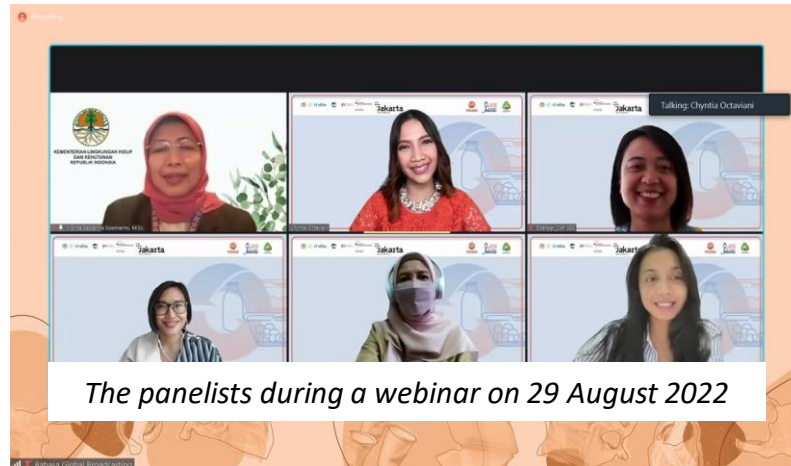

**Support from Mr. Anies Baswedan, Governor of DKI Jakarta for The Jakarta Reuse Movement**

*Training for merchants aimed to introduce CAP SEA project and promote reusable food container to merchants in DKI Jakarta on 11 May 2022*

*Public consultation aimed to collect all relevant stakeholders' input on reuse ecosystem in the food & beverage sector, DKI Jakarta on 27 July 2022*

*The panelists during a webinar on 29 August 2022*

*Consultation meeting with GIDKP on Reuse Grid Infrastructure on 14 September 2022*

# Project Implementation

*What are your main challenges in the pilot project implementation?*

- ✓ Reusable Food Container is not a new solution because concept of reusable container has been applied by Indonesian people along time ago, for instance the usage of Rantang.
- ✓ The main challenges of Introduction of Reusable Food Container in Food Delivery Service are:
  1. How to ensure **the hygiene and sanitation of reusable food container** to online food customers.
  2. How to **track, monitor and evaluate** the number of single-use plastic food containers being reduced.
  3. How to sustain the concept of **reuse as a service**

*Rantang*

# Project Implementation

## What works?

- Good progress on the implementation of **Jakarta Governor Regulation No. 142 of 2019** about the obligation to use eco-friendly shopping bags
- **Continuation collaboration** with GIDKP to reduce single-use plastic waste in the food delivery service as one of DKI Jakarta' efforts toward **GHG emission reduction at waste sector**.

## What are the lessons learnt?

- The importance of **regulations** as the basis for implementation and followed by the development of **good practice guidance** (*Panduan Praktik Baik*), **standard** and so on.
- The importance of **collaboration** and support from all relevant institutions.
- It **takes time** to change the habit of eco-lifestyle.
- The importance of **continuous coaching and mentoring** for the implementation of reusable food container in food delivery

## *Next Step*

### Where is future action needed?

In line with DKI Jakarta' support and role toward The Ministry of Environmental and Forestry Regulation, P75/2019:

- **Regulation Development to restrict other types of single-use plastics**, such as Styrofoam, straws, cutlery, or other single-use plastic packaging in food and beverage sectors.
- Development of **good practice guidance on single-use plastic waste control** in Food and Beverage Services, Accommodation and Retail.
- Development of **control assistance guide on single-use plastic** that can be used as a reference for business entities
